Error getting images:%i% BMWSSS31ProgmanV32 .....  
..... 50b96ab0b6

The problem is the first name "BMWSSS31ProgmanV32" in this line : String result = URLEncoder.encode("UTF-8", "US-ASCII").encode(result, "ISO-8859-1") As I'm French, it encoding me the "❖" character instead of "ö". How can I work around this problem? I guess it's a bad encoding problem. Is it the case? A: I suspect that it is because the encoding you are using is UTF-8, but the file you are looking at doesn't actually contain any UTF-8 characters. Try using a different encoding, like UTF-16 LE and see if that works.
