Pretty decent game, honestly didn't expect to like it as much as i did.. This is just the prologue but this game feels outstanding from the beginning and the story plot only thickens. Some of the character lines sound a little corny but hilarious at the same time. i recommend this game as it will be alot of fun to play through.

<https://www.youtube.com/watch?v=-fapF2Lxp1o>. It's nice being a unity game, if seems slow paced in the initial stages of the game and the weapons handle pretty well.

would be nice to see a sequel for this. A decent low budget half life style title with bad but hilarious voice acting my only real complaint is isnt very well optimized and i had some low fps in places but not to the point where it ruined the game overall if you looking for something similar to half life and arent scared off by rough round the edges indie titles this is a good purchase for the price. Yeah, I've been waiting about 3 or more years for this game to come out, and overall, here are my thoughts...

GAMEPLAY: Pretty good, also comes with different difficulties

GRAPHICS: Graphics are nice, though the mouths on NPCs don't move when they talk and water reflections sometimes don't match the scenery

SOUND: Music, gunshots, for the most part everything is pretty descent, although, for the most part, voice acting isn't really convincing

LENGTH: About 5-6 hours of gameplay in the campaign

IS IT WORTH FULL PRICE? (\$11.99): Maybe

OVERALL: 8/10

You can be left handed.. The game is an interesting as it looks and the animations and voices are cheaply made, the gameplay wasn't very enjoyable.. Feels and plays a lot like the F.E.A.R. series but it's some Russian shooter. I like it!. Yeah, I've been waiting about 3 or more years for this game to come out, and overall, here are my thoughts...

OVERALL: 8/10. Not biased at all since I'm the composer, but this game is actually really cool! Tons of effort went into it, and it's really come a long way. It's fun, fast, and a neat throwback to some early Source Engine games. It's great for YouTuber's looking for a new game to play on their channel, and anyone who is a fan of early 2000's shooters will love this game and it's gameplay.

Must buy! 10/10. I was not sure wheter to recommend this game or not during the whole playthrough, but after I beat it, I decided to recommend it in the end. It looks like it's trying to imitate Half Life 2 experience, and it comes pretty close, but not quite.

Positive:

- OK graphics and level desing

Negative:

- Ugly hitbox and damange mechanics

But overall a positive experience. Don't have much more to say.. I can't recommend this game, the maps are pretty good but besides that everything is pretty much just sub par. Actual gameplay is extremely basic, (at least in the beginning of the game, I don't know much about the game afterwards). Combat is about as basic as it gets, recoil feels odd and bad on most guns, it just isn't fun. Enemies? Walk toward you or stay in one place to shoot you. Their models are alright, animations are definitely C-D tier. Sounds are definitely taken from royalty free websites.

This isn't a B tier game as one of the other reviews said, it's a C- tier game, and even that's somewhat generous.

Stalker call of pripyat is probably a better choice if you want this game and frequently goes on sale with plenty of mods. You can typically get that game for half the price of this one (or for free from certain websites, though I'm not advocating it).

Bottom line: It's a nope on this game unless it goes down to 3 dollars, that's what it's worth to me, if you want to pay more go ahead, it's just my opinion.

To its credit it was made primarily by one guy and he has a playlist of over 6 years of making this game. It's just a damn shame he didn't get more help.

A+ on the animation for the logo though.
